

36 Blomfield Rd  
Maida Hill W.  
The 6<sup>th</sup> Jan. 97

Dear Professor Thompson.

I have recently found the  
Crystal Epidote polarising the  
Electric Ray to a remarkable extent.

I wonder whether it would show  
a similar action with the Röntgen  
ray. I enclose two small  
specimens.

Yours truly  
H. Boose.
